Web Developer Cover Letter

Dear Hiring Manager,

I am excited to apply for web developer opportunities. I have hands-on experience building responsive and user-friendly websites and web applications using HTML, CSS, JavaScript, React, Next.js, Node.js, PHP, WordPress, MongoDB, and related tools.

I enjoy creating clean interfaces, solving real problems, and turning ideas into practical digital products. In my work, I focus on responsive design, usability, clear code structure, and delivering websites that are easy to use and maintain.

I have worked on frontend development, WordPress-based websites, and full-stack web projects. I am also comfortable learning new tools quickly and using AI tools to support planning, coding, debugging, and faster execution.

What I bring is a strong willingness to learn, attention to detail, and a positive attitude toward teamwork and client work. I would be happy to contribute my skills, keep improving, and grow with a team that values quality and practical results.

Thank you for your time and consideration.

Best regards,
Pradipta Sarker
